

### In the box

- Two large universal ear tips
- Two medium universal ear tips
- Two acoustic filters with membrane technology "20dB"
- Aluminium key-ring carrying case
- Manual EN, FR, DE, IT and ES

### Crescendo Office reusable hearing protection

Whether you're programming, designing or typing a letter there are times when the constant noise in an open plan office environment becomes too much to bear. The low frequency noise from air conditioning and computer fans impairs cognitive performance; the addition of intrusive speech and telephones' ringing further reduces your concentration.

The Crescendo Office universal fit hearing protection was developed to reduce all these sounds to an acceptable level. Conversations fade into the background and telephone ringing becomes less intrusive. However you can hear conversations if you choose to, so you'll never feel isolated or occluded.

Crescendo Office is a discreet noise reduction ear plug designed to be worn all day without causing irritation. Whilst other office hearing protection can sound muffled and unnatural, Office filters manufactured by Dynamic Ear Company provide full frequency sound reduction. The advanced technology membrane filter design from DEC keeps an open air passage to the ear, minimizing occlusion effect while keeping the ear ventilated for optimum comfort.

### Product specific benefits

- Improved concentration through noise reduction
- Reduction in stress as concentration becomes easier
- Reduces computer fans & air-conditioning noise
- Annoying chatter becomes less intrusive enables selective hearing

### Crescendo facts

- Natural - filter technology maintains spatiality
- Feel better – high noise levels are tiring, Crescendo reduces noise
- Comfort - Crescendo filters allow air into the ear minimising irritation and 'hot ear'
- Environmental friendly – Ear tips are made of 100% organic material generating only carbon dioxide and water during incineration
- Upgradable - The filters of your Crescendo hearing protection are replaceable and upgradable for use in custom fit ear moulds designed for Dynamic Ear Company products
- Safety standards - hearing protection certified to CE and ANSI standards
- Long lasting - Reusable Hearing Protection, fully washable tips and filters

Based in Delft, The Netherlands, Dynamic Ear Company develops and manufactures innovative hearing protection and sound management solutions for musicians, industry and leisure activities, almost every application where loud sounds can cause permanent hearing damage.

**You might also like...**

Crescendo manufactures hearing protection solutions for a range of uses. Whether work or recreational we have developed products with attenuation curves designed to remove the frequencies that cause most damage to your hearing. Crescendo also manufactures earphones using the latest balanced armature receiver technology, reproducing music as it was recorded.

**Product specifications**

Ear tip type	Universal fit, Reusable, Triple flange
Ear tip material:	Medical grade TPE
Ear tip sizes:	Medium (6-11mm) & Large (8-12mm)
Ear tip colour	Transparent
Filter colour	Grey
Dimensions Package:	90mm x 160mm x 22,5mm
Weight Package:	40 g
Article number.:	PR-0389
EAN code:	8718469033898
Warranty:	Two year limited warranty
